

# Windows Seven Migration

Windows 7

Considering the multitude of sometimes contradictory information, it is not always easy to know what is technically possible to realize the Windows Seven migration of ATMs.

First of all, let's identify the ranges of ATMs depending on their migration's capability.

## 95% Compatible *Manufactured since 2008*

Globally, all the ATMs manufactured since 2008 have a PC supporting Windows Seven. It is nevertheless recommended to check the size of the memory and the hard disk.

We find the ranges **Diebold Opteva** with PC " **Denver** " or "**Sierra**", the ranges **NCR SelfServ** and the ranges **Wincor ProCash Xe USB** and **Cineo**.

## Partial Compatibility

*Manufactured between 2003 & 2008*

Regarding ATMs manufactured between 2003 and 2008, the PC must be usually replaced as it is the case on the ranges **Diebold Opteva** with PC " **Breckenridge** ", the ranges **NCR Persona** with **iMCRW** reader and the ranges **Wincor ProCash Xe**.

## Restricted Compatibility

*Manufactured before 2004*

For ATMs manufactured before 2004, only **NCR Personas 5886, 5887** and **5877** can be upgraded, but with a heavy process of replacement of the reader and the harness, without counting the PC.

The other models of Persona, as well as the ranges **Diebold iX** and **Wincor ProCash NG** cannot be upgraded under Windows Seven due to the fact they don't have the drivers for this OS.

## Hardware Upgrade

*Exatec ATM* supplies complete PC qualified for Windows Seven as well as other upgrade types such as memory, hard disk and boards for the ranges :

Whatever the model of ATM, *Exatec ATM* proposes the right PC, at the best price, and depending the needed configuration. It is absolutely not necessary to invest a brand new PC of the last generation to upgrade any ATM in service for more than 7 years. These ATMs can extend their life for at least 5 additional years, without compromising their profitability, both for the hardware aspect and software aspect.

## Software : Asoft ATM

*NDC+, D912, ISO 8583*

*Exatec ATM* supplies the complete software solution developed by **ArsBlue**, with the family **Asoft A2Z**, including ATM software **Asoft ATM**, switch server, monitoring and videosurveillance.

Your ATM Software, **Asoft ATM**, gives the incredible advantage to include all functionalities with a unique license, moreover, with the capability to transfer it on other ATMs, when will come the time to replace the current ATMs.

**Each Asoft ATM license is attributed for life.**

**One unique license :**

- Regardless the OS (XP, Seven...)
- Regardless the protocole (NDC, D912, ISO 8583)
- Regardless the implemented functionalities (withdrawal, deposit,

payment, transfer, inquiries, cardless operations...)

- Regardless the model and the brand of the ATM

**Your license with unlimited use, is transferable from an ATM to another one.**

**One unique application :**

- Easy setting
- Easy maintenance
- Easy management
- Same functionalities on all ATMs

**All functions :**

- Withdrawal,
- Cardless withdrawal,
- Deposit,
- Change,
- Payment,
- Reload of prepaid cards
- Transfer, Inquiries...

## Services

*Exatec ATM* helps you for the migration of your ATMs on Windows Seven, whatever is the model or the brand, to allow you to deploy your software solution on the whole fleet of ATM.

In addition to the settings and the tests for migrations, *Exatec ATM* can train your teams, add new functionalities, customize your images and messages and include videos.

The PC can be shipped with your application already installed and configured.

These services can also apply to **ArsView Monitoring** as well as the **video surveillance**. Their advantages can be tested free of charge during three months, to allow you to see its interest before deploying the solution on the whole fleet.
