

## Complete ATMs

*Exatec ATM* has a **huge stock of ATMs** to help our customers for the following needs :

- **Onsite installation**
- **Offsite installation**
- **Demo machine**
- **Testing machine**
- **Training machine**
- ATM for **cannibalism**

Depending on the needs of our customers, *Exatec ATM* can offer the following qualities :

- **re-manufactured As New**, including repainting inside and outside in our own painting booth, and renewing of each module
- **Refurbished** without repainting, dispenser and badge reader being as new, all other modules being cleaned and tested
- **Controlled and tested** with the requested configuration as ordered
- **As Is** in the original configuration
- **Incomplete**, by withdrawing some modules, not needed by the customer and helping to reduce the price
- **Brand New**, on opportunity, from 1 to 50 units.

On request, *Exatec ATM* can negotiate a **tailor-made solution**, mixing the previous options to perfectly fit with our customers.

*Exatec ATM* proposes **complete ATMs sold as spare parts**. In this case, **we dismantle the main modules** and we list all the part numbers in order to let our customers complete sets of parts, usually for the maintenance, at a **very low fare**. In addition, due to the **reduced volume**, you can **save a lot of money** on the shipment compared with complete heavy machines.

Whatever the selected options, *Exatec ATM* can prepare orders for complete machines **from one single unit**, to complete sets of ATMs, shipped **by container** or **full trucks**.

The **transport** can be arranged by *Exatec ATM*, by **truck**, **boat** or **airplane**. Our customers can also arrange the transport by themselves, using their own partner to pick up the machines from our warehouse.

While selling complete ATMs, all **PCs** are supplied **without software** nor license and the customers have to manage the software aspects as they use to do for the rest of their ATMs.

Following the selected quality, the **warranty period** provided by *Exatec ATM* can be extended **till 1 year** for the parts, excluding vandalism and consumables. The warranty period starts no later than 1 month after the custom clearance.
